**compatible for Adobe Lightroom 4 5, 6 as well as CC.**

- The Single Pack Includes 1 Lightroom Preset

One of our favorite filters that we employ to edit our pictures using Instagram, Instagram is known as the "Gingham" filter.

We've taken an ordinary gingham Instagram filter does and turned it into a professional, high-top Lightroom Preset which can be utilized on any kind of subject.

The rendition that we created of the Gingham filter gives us what we call a deep semi-matte effect that has smooth velvety undertones, contrasting with flawless soft overtones.

This new NEW preset features an extremely specialized sort of processing that is totally and completely distinct and different from any other preset that we've previously made available.

### This Preset works on the following:

- Portraits
- Food
- Landscape
- Animal Portraits
- Nature
- Still Life
- Indoor Photography

### What Will This Preset Do

- Rich, creamy overtones
- Smooths imperfections
- Softens harsh highlights and gives the appearance of a semi-matte velvet
- Subtle deep tints and stunning blue/green hues
- Enhances the skin tone of portraits
- The cold blue tones are added while retaining the warmth
- A very flexible setting to present.
