

Blender Market – Cinepack: Pre-Animated Camera Moves v4.2.2.1

2025-02-10 17:01:57 label 我要反馈 下载页面

An enormous collection of pre-animated, completely customizable, professional camera movements designed specifically for Blender was created to improve production efficiency and reduce time!

It is easy to import into your scene motions from cameras that are typically seen typically found in Hollywood Movies, Motion Graphics ads, VFX, and Adverts Shots that were designed by a cinematographer with 10 years of working in film. It will be difficult to remember how you managed to do it without CinePack!

- Pans
- Zooms
- Extras

What is Cinepack: Pre-Animated Camera Moves?

"Pre-animated camera moves" refers to a filmmaking and animation technique where camera movements are planned and executed in advance, before actual filming or animation takes place. This technique allows filmmakers and animators to achieve specific visual effects, storytelling elements, or cinematic styles by precisely controlling the camera's motion.
