and roll-off compared to Kodak. Offers rich, yet balanced colors and saturation. A top choice for Fashion and Beauty, but versatile across genres. Provides flattering skin tones. Greens appear cool and vibrant, while skin tones have a golden hue. Blues lean towards a modern turquoise, with accurate yellows.

'Bleach' - Inspired by Fujifilm Super F 8552

- Used in: "Munich," "War of The Worlds," and "Crash" Emulates the Bleach Bypass process, resulting in strong contrast and subdued saturation. Yields an aggressive, gritty aesthetic, balancing between black and white and color film. Ideal for War Films, Crime dramas, and Urban Fashion. Pairs exceptionally well with heavy film grain for added authenticity.
- Compatible exclusively with the iPhone 15 equipped with Apple Log technology.
- It was developed through extensive testing and exposure-matched footage comparison with an Arri Alexa Mini.
- Offers precise emulation of Alexa's renowned color science, including nuanced aspects like non-linear hue responses, subtractive color modeling, and saturation dynamics.
- Each LUT is meticulously crafted to achieve accurate and pleasing color reproduction, enhancing the overall visual quality of your footage.

What isPhantom LUTs – iPhone 15 – Apple Luts?

"Phantom LUTs" and "Apple LUTs" are terms commonly associated with color grading and image enhancement. LUT, or Look-Up Table, is a file that contains instructions to adjust the colors and tones of an image or video during post-production.

While "Phantom LUTs" lacks specific context, it could refer to a brand or a specific set of LUTs tailored for particular effects or styles. On the other hand, "Apple LUTs" likely pertains to Look-Up Tables designed specifically for enhancing images or videos captured on Apple devices such as the iPhone 15, known for their advanced camera technology and photography capabilities.

In summary, these terms indicate tools or methods used in digital imaging to refine and enhance the color and tone characteristics of media, especially those captured on Apple devices like the iPhone 15.
