LEADTOOLS Multimedia is specifically made for the evolution of audio/video software across a huge array of industries, such as protection, air travel, and safety. The Multimedia SDK provides developers a complete assortment of technology that turn generally complicated DirectShow and Media Foundation jobs into easy tasks. The integration of heart multimedia performance, like playback, capture, transformation, and processing to software, is simpler than ever before using LEADTOOLS Multimedia.

LEADTOOLS Multimedia is your foundation product and starting point for developers creating powerful multimedia software based on DirectShow and Media Foundation together with the LEADTOOLS Multimedia Family. Watch the Multimedia Product Comparison Chart determine that multimedia feature filters and codecs are contained with different Multimedia products.

LEADTOOLS Multimedia is your foundation product and starting point for developers creating powerful multimedia software based on DirectShow and Media Foundation together with the LEADTOOLS Multimedia Family. Past the core performance, LEADTOOLS comprises a huge group of innovative features that could be inserted through value-oriented add-on modules or á la carte. Watch the Multimedia Product Comparison Chart determine which attributes, filters, and codecs are contained or need additional licensing.
