

## Deploying ASP.NET Core 6 to Azure App Services - Neil Morrissey

2025-03-27 20:49:23   [label](#)   [我要反馈](#)   [下载页面](#)

Discover the comprehensive features of Azure App Service, providing a robust environment for hosting your ASP.NET Core 6 applications. In " ", you'll delve into various deployment methods, from standalone approaches to integrating with DevOps processes through Continuous Integration/Continuous Deployment (CI/CD).

Throughout the course, you'll gain practical insights into creating and configuring an App Service in Azure, laying the foundation for deploying your ASP.NET Core applications. Learn step-by-step procedures for deploying your code to App Services using standalone methods and sophisticated DevOps approaches leveraging Azure Pipelines and GitHub Actions.

Gain proficiency in database deployments alongside your ASP.NET Core applications, ensuring a comprehensive understanding of deploying complex solutions to Azure App Service. By **Deploying ASP.NET Core 6 to Azure App Services - Neil Morrissey's** conclusion, you'll possess the necessary skills and knowledge to confidently deploy your ASP.NET Core applications, empowering you to leverage the full capabilities of Azure App Service for your projects.

## Deploying ASP.NET Core 6 to Azure App Services Table of contents:

- 1. Course Overview (Duration: 1 minute)
- 2. Understanding Azure App Service (Duration: 50 minutes)
- 3. Deploying ASP.NET Core Application to App Service (Duration: 51 minutes)
- 4. DevOps Deployments Using CI/CD (Duration: 29 minutes)
- 5. Database Deployments with an ASP.NET Core App (Duration: 50 minutes)
