Blender Market - Blender Labelling Tool v0.0.11

2025-02-10 16:53:04 label 我要反馈 下载页面

Blender Market - Blender Labelling Tool is an open-sourced free tool with one goal; efficient video labelling. The tool allows users to draw bounding box annotations on any video and have them exported in a whopping YOLO file format. The tool does not require installation as it is a browser extension that works on the web. The team plans future versions to implement support for the COCO and Pascal VOC formats, segmentation labelling, 2D joint and skeleton data, rotated bounding boxes, and even 3D data labelling. Performance, cross-platform usability, and simplicity remain the top priorities, all while taking advantage of animation-making and video editing in Blender.
