

RGB Glitch Photo Effect GraphicRiver-33926075 (PSD)

The reason for distortion is incredibly unpredictable in the beginning, it's a result of an accidental mistake, which causes the entire result to be different. We've distilled the primary significance of distortion and have delivered the effect in a manageable glitch-like effect!

Just the effect is fantastic, but what do you add **five color filters** that can be applied to alter the visual perception? The graphics are broken into pixelated designs within one glance, and make stunning, glitchy photos!

The images and models are used for purposes of presentation and are not included in the product.

What's inside?

- high-resolution PSD file;
- 4500x3000 px, 300 dpi;
- 5 color filters;
- Help file.
