下载页面

Shape Key Selector is an intuitive and customizable addon designed for choosing model shape keys from a visual menu, without requiring any rigging.

How can users choose and animate character expressions quickly and easily?

They can work from "Blender Market - Shape Key Selector" to design their project.

This tool simplifies the process of facial animation, enabling users to select and animate character expressions quickly and easily. With a one-click setup, users can manage images, selectors, and drivers for character expressions, making facial animation accessible even to those who find face rigging complex.

"Blender Market - Shape Key Selector" Samples:

Shape Key Selector offers several Quality-of-Life features, such as bulk-adding and rendering of shape key images, separating left and right shape keys for asymmetrical expressions, inserting keyframes for all or selected shape keys, adjusting snapping increments for precise expressions, and renaming shape keys with one click.
