

Mekajiki – RenderGarden 1.2 for After Effects Win/Mac

2025-02-10 16:37:17 [label](#) [我要反馈](#) [下载页面](#)

Hyper-threaded Network Rendering for Adobe After Effects

Network Rendering

Grid multiple computers together in your system. Render QuickTime/AVI Movies or Picture Sequences. Simple to install. No custom scripting or network config. Endless Render Node licensing.

Background Rendering

Continue working in After Effects while your comps leave in the background. The choice for Post-Render transcoding into MP4 or QT. Render Numerous comps in order or in parallel.

Render Monitoring

Monitor local and distant renders with all the RenderGarden Monitor panel right in After Effects. Re-Plant, Kill and Perform tasks or seeds. Check the status of leaves including progress and projected completion time. Manual or automatic refreshing of active occupations. Screen Terminal/Console Telephones directly within After Effects.

Improved Render Speeds

Render 2-3x quicker * with Hyper-threaded Rendering. Maximize your Mac or PC's CPU usage. Render several frames simultaneously. Render Numerous comps in order or in parallel. (*Not endorsed in After Effects 18.3 or afterward.)
