#### Unreal engine - Aunardi N8 Drivable CAR v5.3:

Introducing a high-performance super sport car that seamlessly integrates into various games, equipped with an array of features to enhance gameplay immersion and customization options.

- **Driveability:** Enjoy smooth and responsive controls for driving the car in-game.
- **Speed Unit Selection:** Choose between kilometers per hour (KMH) or miles per hour (MPH) for speed unit display.
- **Customization Auto Save & Load:** Personalize your car with customization options, with automatic saving and loading for convenience.
- **Fuel System Ready:** Toggle the fuel system on or off based on your gameplay preferences.
- **Speedometers:** Access speedometers in both HUD and interior views for accurate speed tracking.
- **Editable Number Plates:** Customize the license plate text with two editable options available in white and yellow.
- **HUD Mirror:** Enable or disable the HUD mirror feature as desired.
- **Style Customization:** Modify various aspects of the car's appearance through the customization menu.
- **Engine Sound & Interior:** Immerse yourself with realistic engine sounds and a detailed interior design.
- **Exhaust Visual Effects & Sound Effects:** Experience dynamic exhaust effects and corresponding sound effects.
- **Skidmarks Visual Effects & Sound Effects:** Leave skidmarks on the road with corresponding effects, while airborne, no marks are left.
- **Auto Centering Camera:** Keep the car centered in the camera view for improved control.
- **Lights & Flip Car Feature:** Activate lights and flip the car if needed for added realism.
- **Sport Tyre Materials:** Choose from two different sport tyre materials to suit your preference.
- **Multiple Skins:** Access three different skins to change the appearance of the car.
- **High-Quality Sport Wheel Set:** Receive a high-quality sport wheel set as a bonus gift.
- **Car Paint Materials:** Customize the car's paint with various material options.
- **Main Camera Zoom In-Out:** Adjust the main camera's zoom level for better visibility.
- **Main Cam Speed Perspective Effect:** Experience a speed perspective effect with the main camera.
- **Smooth Crossing Side & Interior Camera:** Seamlessly switch between side and interior camera views for varied perspectives.
- **Brake Disk Heat Emissive Effect:** Visualize the heat emitted from brake disks for added realism.
- **Bonus Race Track Props:** Receive additional race track props along with animated text material and sharpen post-pro material.
