**Videohive Virtual Studio Set – S07 37577251:** This is a photorealistic program ideal for any program, including news dialog business, sports, weather, and even story programming. This project is constructed as a complete 3D scene that has ready-to-use 18 cameras and you are able to include your own cameras in the scene at your discretion. The camera movements are built off broadcasting programs that cover the entire spectrum of your needs and include controls for transforming the presenters and their placeholders. The project is straightforward and is a single scene ( comp ) that has many layers and cameras that allow you to give a smooth and enjoyable experience. Remember, the minimum time required for loading 3D models and textures takes about 8-10 minutes on my personal PC ( Nvidia GTX 1070 - Intel i7-7700HQ processor - 32GB RAM ) however the rendering is speedy.
