Blender Market - Gravity Rope:

Gravity Rope is an intuitive simulation tool designed for artists and motion designers to create realistic rope animations. This user-friendly Blender add-on offers a versatile workflow for animating ropes with various material presets, such as Cotton, Nylon, and Elastic.

With support for collision, wind response, breakage, and pendulums, users can achieve dynamic rope interactions, including hooking, falling tails, and custom paths.

Additional features allow clustering, scattering, and bridging ropes between objects, with support for baking animations such as .abc sequences.

Planned Features include self-collision, more rope attachments, cluster-based pendulums, particle-based scattering, and bridging ropes across multiple objects.
