Aescripts Walker Tool v2.0.2 (WIN+MAC)

2025-02-10 17:03:42　　label 我要反馈　　下载页面

allows you to create walks and runs with only a couple of clicks. Compatible in conjunction with Rubberhose, Limber, PuppetTools and Duik however it works especially effectively when used with Rubberhose and Limber due to the stretch.

The most difficult part of walking is the motion of your legs which is why you may not often want to perform it manually.

This is the place "Walker Tool" comes in useful.

Walker Tool lets you create walk or run animation with just a few clicks and with no keyframes.

Walker Tool works with all the most well-known tools for rigging characters:

- RubberHose
- Limber
- Duik
- PuppetTools
