Unity Asset - Destroyed Building Kit:

This modular building kit is a versatile tool for creating structures ranging from intact buildings to rubble piles.

It features grid-oriented, interchangeable parts for customization, and uses vertex painting for realistic damage and grime effects. The lightweight, optimized models are suitable for current hardware and maintain high detail both up close and at a distance, making them ideal for various project types, including shooters, simulators, and isometric strategies.

Rendering Compatibility:

- Works seamlessly with Deferred and Forward rendering paths.
- Fully compatible with HDRP (High Definition Render Pipeline) and LWRP/URP (Lightweight/Universal Render Pipeline) from version 6.0.0 and up.

Asset Collection:

- It includes 500+ 3D models, which are ideal for detailed scene construction.
- Features 18 matching rubble piles for realism in environmental design.
- 45 detailed models of doors and frames.

Custom Materials and Shaders:

- Comes with 21 custom PBR shaders/materials for high-quality texturing.
- Supports using single material across multiple objects with up to 64 color variations (script included).
- Each material is highly customizable and supports vertex painting.

Walls and Structures:

- **Exterior wall options:** Concrete, Cinder Block, and Brick.
- **Interior wall options:** Concrete, Cinder Block, Brick, Plywood, Drywall, Wallpaper, Wood Frame with Insulation, and Moldings.
- **Variety of floor and ceiling materials:** Concrete, Wood Frame, Plywood, Tiles, and Wood Flooring.
