Lara Jade – Lightroom Presets – Fashion Film Set:

The "Lightroom Presets - Fashion Film Set" is a collection of 15 unique color presets inspired by retro fashion and 1980s Hollywood films, specifically designed for Lightroom and Adobe Camera RAW.

These presets, ideal for fashion editorials and campaigns, feature cross-process recipes, matte shadows, earthy tones, and realistic film grain options to enhance urban studio and cityscape photography.

The set includes an installation and usage guide, a PDF preset guide with descriptions and recommended combinations, and is compatible with both MAC and PC.

Best used on RAW images, the presets are customizable and editable, with optimal performance on well-exposed images.
