#### Cinecolor - Primaries LUT Pack:

PRIMARIES is a color correction process using LUTs (Look-Up Tables) to neutralize colors and create an ideal starting point for creative grading. The LUTs correct technical issues such as contrast, white balance, tint, and color balance, improving the efficiency of the color grading process.

The workflow involves testing 10 included LUTs on a single raw shot to identify the best neutral base, and then applying the chosen LUT to other shots captured with the same camera and lighting conditions.
