AE for Funsies – 2. 5D Parallax and Parenting: Are you intrigued but scared by 3D Animation using After Effects? I've got you covered!

In this course, we'll understand joining layers as a simple rig for a smooth workflow. Also, we'll explore how simple the process is for adding half of a dimension to our artwork for cool parallax effects. These tools can transform your flat design into a new world of possibilities. It's your choice how far you'd like to make these tools go!

Ich, Alyssa Smedley, AKA Horrible Horris, will be your teacher throughout this continuing adventure through After Effects in the name of Funsies.

This class is designed for people unfamiliar with After Effects or looking for an opportunity to refresh their knowledge. If you're brand new to AE, I'd suggest looking at some of my previous classes, which teach you the fundamentals of keyframe animation.

After this course, you'll be able to take home sweet new animation techniques as well as a desire to master Adobe After Effects and a short piece of Animation ready to showcase to your loved ones!

I've created a small scenario for you to play with, but I suggest you try it on your scene to create the most effective for creating your practice.

The class is intended to be enjoyable, lighthearted, explore advanced techniques, and have an easy lens.
