Blender Market - Physics Placer

The Physics Placer Addon for Blender streamlines dynamic object manipulation, enabling creative and realistic simulations in three simple steps:

- **Select Dynamic Objects:** Choose the objects you wish to animate, setting the foundation for your scene.
- **Choose a Collision Object:** Identify a collision object to define the interaction dynamics within your scene.
- **Drop and Throw with Ease:** Activate the drop mode using the 'U' shortcut to drop or throw objects, adding dynamic realism to your designs effortlessly.

This addon simplifies the process of creating interactive and visually engaging physics-based animations.
