Unity asset - Dog – Shepherd v3.0: Introducing the Realistic Shepherd Dog model, a meticulously crafted asset designed to bring lifelike canine companions to your Unity projects. This asset boasts extensive features, including over 100 animations, three colour options, and compatibility with Unity's render pipelines.

Render Pipeline Compatibility: Compatible with Unity's Built-in Render Pipeline, the Realistic Shepherd Dog model seamlessly integrates into your project. Additionally, support is provided for the Universal Render Pipeline (URP) and High Definition Render Pipeline (HDRP), ensuring flexibility and optimization across various platforms.

The Shepherd Dog model features 57 bones and 14,700 triangles, with four levels of LODs enabled and configured for optimal performance. Texture maps, including albedo (with alpha mask), AO/metallic/roughness, and normal maps, are provided at 2048x2048 resolution. For mobile platforms, a separate model with 2,900 triangles is included.

Animations: With over 100 animations, including Idle, Attack, Hit, Death, Digging, Bark, Eat, Drink, Sleep, Jump, Run, Swim, Turn, and more, this asset offers a comprehensive range of behaviours to bring your virtual Shepherd Dog to life. The Realistic Shepherd Dog model provides various movements and interactions, whether playing, exploring, or resting.

Location Objects: Besides the Shepherd Dog model, this pack includes objects to create a realistic environment for your furry friend. From barriers and toys to bowls, mats, beds, and dog houses, you'll find everything you need to build a complete and immersive setting for your Shepherd Dog.

HDRP Support: While textures support HDRP, please note that ready-made locations and materials are not included in the asset. However, with the provided objects and textures, you can create custom environments tailored to your needs.

Experience the unparalleled realism and versatility of the Realistic Shepherd Dog model, perfect for adding dynamic and engaging canine companions to your Unity projects. Whether creating a virtual pet simulator, a simulation game, or a realistic environment, this asset offers the tools and animations you need to bring your vision to life.
