## MrAlexTech – MagicAnimate for Davinci Resolve:

MagicAnimate is a versatile animation tool offering seamless effects like whips, spins, and zooms with a simple toggle.

Users can create custom presets with the MagicAnimate Saver tool, utilize 10 additional creator tools, or choose from 100+ built-in dynamic presets compatible with any framerate or resolution.

Designed for DaVinci Resolve 17.4+ (Free & Studio versions), it is fully tested on Windows and macOS, with limited iPad functionality and untested Linux support.
