Blender Market - Forest Generator:

Forest Generator is a powerful procedural Geometry Nodes setup for Blender, designed to create realistic forests in seconds.
It offers:

- **Multiple Biomes**: Currently supports two biomes, with more planned for future updates.
- **Customizability**: Easy-to-use sliders allow users to shape forests to their artistic vision, adapting to any form.
- **Tree Details**: Features highly detailed, customizable tree models with adjustable subdivision levels.
- **Performance Optimization**: Includes low-poly forests for backgrounds and resolution zones to optimize performance.
- **Delete Zones**: Enables users to clear areas for custom elements.

This tool combines flexibility and efficiency, making forest creation intuitive and resource-friendly.
