Portrait Illustration (Photoshop and Illustrator): Participate in a workshop with Martin Perhiniak (Graphic Designer and Adobe Certified Instructor) and discover his workflow and the most effective practices he has developed during his 20 years of experience in the field of creative professionals with clients such as BBC, Mattel, IKEA, Google, Pixar, Adobe.

In this class, you'll be taught:

- Drawing faces: How do you draw faces?
- What is the best way to utilize images of reference when drawing portraits
- How do you easily spot errors in your illustrations and drawings
- How can you stylize portraits to exaggerate expressions
- How do you apply effects to images in Adobe Photoshop
- How to use Clipping Masks in Adobe Illustrator
- How do you make use of the Pen Tool as an expert

It's a way to create:

- Pixel portrait illustration using Adobe Photoshop
- Vector portrait illustration using Adobe Illustrator

Who is this class for?

- Anyone who is planning to become an illustrator?
- Creatives looking to increase their technical abilities and knowledge of Adobe applications.
- Anyone specializing in portrait illustration
- Drawing ability is required, but any exercise can be completed by drawing over photos of reference.
- You don't have to be an artist to enroll in this class.

What do you need?

- Adobe Illustrator and Adobe Photoshop
- Want to create something unique?
