What exactly is Enrich Extension?

Enrich It is an additional feature created to provide a layer-based and visual composition experience with Blender. It takes the stress out of setting up nodes to create every effect and lets you enjoy the fastest and most imaginative way to composite within Blender. Instead of thinking about the nodes that can be used to create a design, Enrich forces you to think about the style you would like to include in your rendering. The extension automatically creates an illustrative node tree that is simple to understand.

Gfx plugin details of Blender Market – Enrich True Visual Compositing v2.1.0

The product is in the **category from Blender Market**, for more information about this post you can click on the home page link in the sidebar.

Why do I require it?

If you're in search of an easy way to finish the post-production process within Blender and without the trouble of creating multiple nodes to achieve each effect the Enrich extension is ideal for you. You'll be amazed by the way Enrich allows you to complete the post-production

If you prefer creating nodes from scratch, Enrich is still a suitable option. You can utilize Enrich for experimentation purposes and quickly experiment with different styles on your rendering. If you're happy with the style it is possible to jump into the compositor and make further adjustments.

New Effects system

The Enrich Add-on 2.0 Introduces the idea of Effects. Effects let you think about the style you would like to include in your rendering. Effects can be used to add Mist, Vignettes, color gradients, and others with controls dedicated to allowing for simple customization. Effects are easily mixed together to allow the creation of a variety of styles within a couple of clicks. The Effects system was built to provide a layer-based compositing experience with Blender.

installation method

- 1. Open the software, click Edit (EDIT) → Preference → Plug-in (AADD-ONS) → Install
- 2. Restart Blender, you can see the installed plug-in in the file → user settings → plug-in
