15 yes, really... 15 top presets to use with Desktop Lightroom & Photoshop and Lightroom mobile (.xmp and .dng files) The presets look best when used with outdoor, moody bright, natural portrait and landscape photography. This is the perfect set that will enhance the perfect Instagram feed. Each preset has been created by an experienced photographer in order to be stunning when paired with a range of photos.

The professional presets are created to streamline workflows when processing and editing photos. They have an elegant and contemporary look. Warm tones, saturated/faded matte, grainy smooth skin, bright shades, and cool tones. It's all in this collection. This pack is a "must-have" for both photographers as well as designers and bloggers. The products have been tested on various photographs and are very effective. The adjustments are precise and clear, which means they work well across Lightroom 3.x up to CC The effect will be exactly identical. It is possible to make use of these presets on any image. They could be described as multi-purpose.

Very important features The result is unique and professional that can be achieved in a single click for bloggers, designers, photographers, and Instagrammers, both professional and amateur. Quality is more important than quantity. There isn't a chance to see from our team 100 presets in one, with minor modifications in between the two, excluding bundles. We are loyal to our customers and do our best to offer the highest quality products. The presets won't alter what's known as the white balance (White Balance) of your photo, they are able to work using exposure, color and contrast, whites blacks, and HSL colors. That means that if the white balance has been set to "OK", they do similar things to what you see for the preview image and it's super easily customizable MAC & PC and MOBILE designed to work with any resolution. No camera calibration profiles are required. adjustments for images that are overexposed or underexposed The supported formats are .jpg, .tiff and RAW (.arw, .srf, .sr2, .crw, .cr2, .dng, .3fr, .mef, .nef, .nrw, .ptx, .pef, .raf, .rw1, .rw2, .srw and more.) It requires Adobe Lightroom from 3.x to CC and Lightroom mobile
