New Changes:

- You can disable showing modifiers in tooltips. This is mostly useful for Mac users that think the tooltips are too big.
- The toolbar label wasn't being saved upon restarting KBar. This is fixed.
- If you press a modifier key and hover over a button the tooltip was wrong.
- The effect button “Loading...” issue is fixed.
- Square text buttons sometimes acted like wide buttons for mouse events.
- Custom png icon buttons in the icon designer had an unbounded width for the preview.
- `kbar.JSON` and `kbar.aeq` were removed in an earlier build of KBar by accident.
- Some customers on Windows 10 were getting "ReferenceError: URL is undefined" at startup.
- Toolbar exports were too large.
- Works with After Effects Beta
- SVG Icons now work in AE 17.1.4
- Purge "All Memory & Disk Cache..." works without needing to remove "&" from the command.
- URLs for help buttons were previously broken
- Some customers were having licensing issues
- Scriptlets and script file buttons can access JSON and AEQuery from the kbar variable.
- Addresses a small issue introduced in 2.0.5 when activating the product on a new machine.
- Shareable toolbars
- More button types
- Makeup to 4 toolbars (with keyboard modifiers!)
- Bulk import and export buttons
