Symphonic Production Kimera (WAV): Over 400 sample tracks of Kimera's highly sought-after Hit Pop EDM vocals. Kimera is among the most sought-after singers to hire and is often spotted at the top of the list on Soundbetter.

Previously published through Sony ATV, she has worked with Stargate, Louis Bell, Rodney Jerkins, and many other top producers.

If you're looking to make your own effects for vocals from the dry samples, or pick from the wide variety of vocal engine-style sounds you can get inspiration from this site.

The pack includes a huge collection of vocal adlibs, hooks verses, and harmonized vocal chord progressions as well as spoken and sung short phrases and transitions and parts for dropping vocals and a multitude variations of "girl sounds" (laughs, kisses, uh, and other adlibs that are not sung). Additionally, Serum presets with Kimera's vocals are also included.

Kimera's voice is heavily in the style of Katy Perry, Dua Lipa as well and Ariana Grande, but with an occasional lighter side similar to Billie Eilish.

Software Requirements: The latest version of Serum to be able to access presets
