Daadi Genesis (One Shot Kit) WAV:

Genesis is a single-shot tool that contains 200 unique sounds that were created for the production of music across a variety of genres. My intention was to collect the elements that comprise my distinctive sound and combine the sounds into a useful set. The majority of these single shots were recorded using instruments that I have in my collection.

Every sound was altered using analog gear and then checked to create an authentic sound that could be used in contemporary music. This resulted in a sound toolkit that has served as a reference base for a lot of my compositions.

The sounds that are included in the pack are royalty-free Except for the 10 vocal loops.
