W.A Production Neon Glow by Arcade v1.0.0b3-TCD: Introducing Neon Glow by Arcade - a groundbreaking plugin designed to immerse your audio in the captivating world of retro Lo-Fi and beyond. Crafted in collaboration with FL Studio ambassador Arcade, this sonic sensation instantly infuses any track with neon-soaked vibes, providing a signature vintage feel at the flip of a switch.

Neon Glow goes beyond typical effects, offering a unique blend of soaking wet and diffused processing. From warm, hazy pads to saturated delays on synths and percussion, the plugin transports your sound to the smoky ambiance of arcade nights. Its versatility is unparalleled, featuring Build and Wash controls capable of sending your entire mix into new sonic galaxies.

This multipurpose plugin isn't limited to chilled beats; it's a must-have for creators across genres, be it EDM, Ambient, or anything in between. Neon Glow, born from the expertise of FL Studio legend Arcade, incorporates his trademark FX chains, ensuring an authentic Lo-Fi experience that has solidified his place in the industry.

Unlock the future past with Neon Glow and let your tracks shine bright. The inner workings of this special plugin are a closely guarded secret, with controls hinting at the vast array of special processing happening under the hood. From individual instruments to your entire mix, Neon Glow delivers characterful transformations inspired by Arcade's bespoke FX chains.

The central Lo-Fi control introduces new-retro vibes, connecting to two additional submodules - Redux and Space. Redux adds a digital retro sound through complex filters and bit reduction processors, while Space introduces chorus effects for a unique sense of spaciousness. The Wash fader adds a spatial wash effect, and the Build fader transforms your tracks with sonic tension and release.

Neon Glow also includes essential features like Input, Output, Bypass, Limiter, and more. The Limiter button controls output limiting while adjusting the input level influences compression. The Bypass control ensures smooth transitions for comparison testing, and A/B options allow saving and copying settings.

Explore the vast array of artist-curated presets included with Neon Glow, providing ideal starting points for transforming your music. With W. A. Production's commitment to creating creative plugins for real-life producers, Neon Glow is your go-to powerhouse for studio-quality processing, delivering results quickly and effortlessly.

- A meticulously crafted plugin by Arcade, an acclaimed artist in the music production scene.
- Unleash your creativity with innovative Lo-Fi processing and versatile poly-effect controls.
- Harness advanced multi-stage processing capabilities for degradation, saturation, diffusion, chorus, and beyond.
- Enjoy a resizable interface, providing flexibility and adaptability to your workflow.
- Experience a seamless and pop-click-free bypass feature for smooth A/B comparisons.
- Utilize A/B/Copy functions for efficient and quick comparison and duplication of settings.
- A responsive and CPU-friendly design ensures optimal performance without compromising your system resources.
- Access a rich collection of artist-curated factory presets for instant inspiration and exploration.
- Comprehensive support with a full PDF manual and a tutorial video to guide you through the plugin's functionalities.
