Blender Market - Clay Doh Tools and Shaders:

Clay Doh is a unique shader pack for Blender that aims to replicate the look and feel of real clay. It features customizable tools and presets for easy and smooth texturing like fingerprints, cracks, and impressions.

Clay Doh brings Cycles and Eevee capabilities, which means it can get the physically based shading experience of the Principled BSDF workflow. The interface is friendly, and it comes with additional tools for creating texts and shapes. This is perfect for all kinds of clay-based animations, stop-motion effects, and other works of art without any need for UV unwrapping or texturing.

- **Amazing clay shaders:** Additional customizable features such as fingerprints, cracks, stones, and impressions for great detail.
- **Shader Presets:** 13 hidden preset shaders can be accessed using the Asset Browser with the inclusion of hidden tips and tricks too.
- **Artist-Friendly Controller Node:** A single node lets users set whatever they want in the Shader Editor.
- **Animation and Stop-Motion:** Features specially designed for animation and stop-motion works.
- **Procedural Clay System:** Create typographic and sculptural clay designs with 2 Geometry Nodes specifically for clay using Geometry Nodes.
- **Free From UV constraints:** Non-animated models do not require any UV unwrapping or unwrapping processes.
- **Correct Shade Rendering:** Built off Principled BSDF, thus ensuring models appear beautifully in all kinds of lit conditions.
- **Broad Compatibility:** Snagless work with Cycles and Eevee rendering engines.

Package Offers:

- A simple and fully comprehensive clay shader model with abundant customization options.
- 13 Controller node shader presets embedding controller node tips and tricks.
- Bonus: Tools for designing clay-based shapes and text.
- Lifetime-free support and updates are provided with this package.
