- place your photo or video in the composition with a layer above

What is a Travel Slideshow?

A "Travel Slideshow AE Project" usually denotes a travel-themed slideshow project crafted using Adobe After Effects (AE). Adobe After Effects is a robust software for motion graphics and video editing, widely employed for generating visual effects, motion graphics, and engaging presentations.

In the context of a travel slideshow AE project, it generally implies the existence of a template or project file designed in After Effects. This template facilitates the seamless creation of a travel slideshow by offering pre-configured animations, transitions, and designated spaces (placeholders) for inserting your own photos and videos.
