These are the top brushes in The world if you would like to draw Trent Kaniuga, as noticed in his youtube videos.

This brush package Is Only Going to use Adobe Photoshop CS5 and later! That is why I place it in the description. But refunds are a big Pain so please do not get this if you do not have Photoshop CS5 or high.

I have also included a video tutorial showing You How You Can utilize these Brushes, and also how to make your own. If you have bought my box collection of Tutorials, you do not need to purchase these brushes, because they are contained in the Box collection of tutorials on gumroad.

I have also contained gradients to get gradient maps.
