

Ukramedia – Smart Rekt v3.3 (WIN+MAC)

2025-02-10 16:57:41 [label](#) [我要反馈](#) [下载页面](#)

SmartREKT is smartREKT is an After Effects script that takes the Rectangle Tool and then puts it into BEAST MODE so that the tool can be speeded up the workflow. This means you have more time to be more creative.

- **Unlimited DOWNLOADS Access, USERS and PROJECTS**
- **30 Day Money Back Guaranteed**

The smartREKT script takes Adobe After Effect's Rectangle Tool and sends it into beast mode. It is the default Rectangle Tool in Adobe AE creates a shape layer which can only be sized by the central point of the shape. This is what you've likely noticed can be extremely annoying. smartREKT offers a wider range of sizes when you size the rectangular layer using different pivot points. It is easy to move the anchor point at any point within the shape layer. You can also adjust margins, and more. Apply the anchor point to multiple layers at once (and not only the text element). The application also generates a modular or responsive rectangular shape layer that is based on the size and anchor point of the layer selected.

Form Shape Layers using Custom Pivot points

SmartREKT allows you to build shape layers using customized pivot points. These can be placed in the middle of each corner or at any other point along the anchor point's path.

Create Multiple Shapes using Just One Click

SmartREKT is the only program that allows you to create multiple shapes with just one click.

Advanced Auto-Size Option

SmartREKT provides advanced auto-size options and is able to be customized to suit your personal configuration.

Advance Shape Layer Margins

SmartREKT allows you to apply margins to all your shape layers in just one click!

Advanced Point of Pivot Options

Add SmartREKT's sophisticated pivot point functions for Your After Effects projects and adjust the location of your objects by using easy keyframes. You can unlock the capability to rotate and move whatever you like with only the click of a mouse.

Simple and Quick for Masking Vector Layers

SmartREKT is the fastest and most efficient method to cover your vector layers with After Effects.Say good-bye to tons of tedious masking, and welcome to this amazing tool.

Advanced Parenting Options

SmartREKT can be described as an After Effects script that provides advanced parental options and eliminates certain limitations that are inherent in the parental workflow native to the program. Because of these features, you'll be able to become more efficient and creative while saving time and money.

Set up an Auto-Resizing MoGraph Lower 3rd

SmartREKT is a revolutionary brand new application designed for After Effects that lets you create motion graphics that auto-resize lower thirds, and reveal them within seconds.

Create Graphics with Auto-Resizing Elements
