- 1.
- 2.

The **APU Software APU Loudness Compressor v3.2.7 (Win, Mac)** is a versatile compressor/expander designed for modern loudness standards like LUFS and True Peak.

How can channels be split or linked for multi-channel formats?

You can use "APU Software APU Loudness Compressor" to design the project.

It employs LUFS measurements for transparent compression, with optional support for traditional RMS and Peak units. Operational flexibility is achieved through source and target range controls or traditional threshold + ratio settings. Learn mode adjusts ranges automatically.

"APU Software APU Loudness Compressor" Samples:

Various modes include expander, limiter, etc. Loudness flavors include momentary and short-term LUFS, RMS, True Peak, and Peak. Channels can be split or linked for multi-channel formats. For more details, consult the LUFS blog post and comprehensive documentation. Developer contact is available through the website.
