IMBUED WITH REALISM

The best sounds are made on the base of genuine sources. Modify and stretch them, bend them, and mash your way to suit your needs due to the natural base sounds. This collection of Starship engine hums and servo whistles constantly maintains an air of authenticity.

ALWAYS DIFFERENT

Except for the continuous sound, every sound comes with six variations, making sure that your blasts, engines, and lifts don't sound the same in the same row. Whatever the case, whether mechanicals, hover bikes, energy impacts, or sound effects from spaceships, there's a sound for the sound you want in various variations to guarantee greater realism.

COSMIC SOUND

We explored a vast array of sci-fi sounds. Built from scratch with our Construction Kit sound sources, these high-quality creative effects all have a feeling of movement and energy. Included are:

- Doors
- Airlocks
- Vehicles
- Timewarps
- Impacts
- Power-ups
- Power downs

TRUE DRAG AND DROP

As per the BOOM Tradition, BOOM's SCI-FI MOMENTUM Designed pack delivers quality effects ready to use immediately. Drag the effects into your project; you'll get a realistic look without additional editing.
