Unreal Engine

Unreal engine - Casual Wear Girls Pack 1 - Streetwear Modern Realistic Stylized Woman Character v5.3:

Express Your Unique Style: Choose from a vast array of customization options including 17 hairstyle variations, 6 tails, 10 heads, 12 makeup styles, 5 headdresses, 40 face and body jewelry pieces, 11 shoe designs, 17 outerwear options, 15 skirts, pants, and jeans styles, 18 various accessories, and an impressive selection of 134 high-quality skins for clothes and shoes.

 Seamless Compatibility: We've meticulously designed the clothing and textures to be compatible with each other, ensuring smooth integration without clipping or other common issues, even when combining top and bottom clothing.

Universal Accessories Included:

- Tails: Choose from fox (Kitsuni), raccoon, cat, rabbit, fantasy, and succubus tails, each with customized physics for realistic animation.
- Japanese Traditional Masks: Access 3 variants with different skins.
- Demon Horns: Select from 3 different styles.
- Ears: Enjoy realistic fox and cat ears, along with various headbands featuring hare, cat, and succubus horns.
- Fantasy Enhancements: Opt for fantasy ears with feathers and a blend shape for elven ears, complemented by long elf eyebrows.
- Additional Accessories: Access a variety of headbands, glasses, face masks, watches, necklaces, bracelets, headphones, piercings, earrings, plasters, and chokers.
- Detailed Undergarments: Experience intricate lace underwear, with 2 stocking options available (long and lace with suspenders; suspenders can be removed. Please note that stockings are only included in packs with skirts).

High-Quality Rendering: The project comes with high-quality render scenes, including three additional maps. Ensure your Settings - "Engine Scalability Settings" and "Material Quality Level" are set to the highest quality for optimal results.

- Adjustable Body Proportions: Customize chest, hips, and ears size to create characters of various body types. Clothing dynamically adapts to these changes, ensuring a seamless fit for any scenario.
- Comprehensive Character Options: Female characters come with full-body and underwear options. It's advised to avoid using full-body with clothing to prevent mesh crossing.
- Diverse Body Textures: Choose from dry and wet body textures after rain or shower, plus a dark elf fantasy skin with multiple variations, including combat facial features such as new eyes, ears, and long furry eyebrows.
- ID Masks for Customization: Utilize ID masks for faces, clothes, and shoes to personalize color combinations of individual elements. Adjust bootlace, fabric, leather, shoe bottom, hair roots, hair ends, makeup, and more separately.
- Advanced Material Setup: Blueprints-based material setup offers advanced features such as shimmering shoe linings during running.
- Convenient Clothing Switching: Easily switch clothing parts via Construction Script for added convenience.
- Fully Customized Physics: Enjoy realistic simulation of hair, clothes, and body movements.
- Versatile Color Customization: Modify skin, eyes, clothes, accessories, and hair colors effortlessly.
- Fine-tuned Shaders: Shaders come with meticulous adjustments including roughness, SSS, micronormal masks, etc., all ready for immediate use.
- Included Animations: Package includes starting animations, with a recommendation for optimal results with ALC4 animations.
- Facial Blendshapes: 52 calibrated facial blendshapes suitable for cinematic cutscenes and compatible with Live Link Face, Faceware, and similar technologies.
- Customized Live Link Face: Easily bring characters to life by connecting your iPhone for facial animation (calibration

may be required based on face shape).
- Configured Instances and ID Masks: Control various material parameters effortlessly with pre-configured instances and ID masks.
- Epic Skeleton Compatibility: Fully compatible with Epic Skeleton, resolving Mannequin-related issues like finger rotation.
- UE4/UE5 Project Integration: Complete UE4/UE5 project with playable character blueprints, body physics simulation, and more, offering plug-and-play functionality.
