Video Copilot Orb plug-in v1.0.3

2025-02-10 16:57:11　　label 我要反馈　　下载页面

Like other Video Copilot plug-ins, it has also evolved! Initially, I had planned to create an instructional video using CC the sphere, but it took too much effort to make it to be 3D-aware! Therefore, we decided to design our own plug-in with a similar approach to Element 3D with the exception of working on a 3D Sphere!

That's when things went out of hand! Naturally, this plug-in comes with even more features than what is shown here and I'm looking forward to sharing all the useful new capabilities!

How to make a 3D sphere effect?

You can create using the "Video Copilot Orb plug-in" in After Effects.

Where can I download the product?

After subscription, You can download it for free from here.

Gfx plugin details of Video Copilot Orb plug-in v1.0.3

The product is in the **After Effects Plugins category**, for more information about this post you can click on the home page link in the sidebar.

Does this product work on Windows and Mac OS? We mostly include the operating system in the title. if it is not written, it will work in Windows, and you can for the Mac version.

What is a Video Copilot Orb plug-in?

Video Copilot's "Orb" is a powerful 3D sphere plugin for Adobe After Effects. It allows you to create and manipulate 3D spheres and celestial bodies with realistic materials and lighting, making it particularly useful for creating planets, moons, and other spherical objects for visual effects and motion graphics.

Realistic 3D Spheres: Orb lets you generate 3D spheres that can be customized with realistic lighting and shading to create the illusion of depth and dimension.

Texture Mapping: You can apply textures to your 3D spheres, which can be images or custom-created textures, to make them look like planets, moons, or other celestial objects.
