11 Lightroom Presets for Mobile and Desktop Lightroom

These presets can help you create an Instagram stream with beautiful images in modern colors. These presets are perfect for bloggers who wish to show their lifestyle, fashion, and travel photos. These presets were carefully designed. These presets can be used for the enhancement of your photos.

You can test the presets with photos taken with professional DSLR cameras as well as phones to get a better experience.

This tutorial will help you install presets. It is easy to follow.

Compatible with App Lightroom iOS/Android as well as Desktop Lightroom.

Both versions can use all ARTA presets.

You can use presets in the FREE Lightroom App. A subscription is not required.

Every camera and every photo are unique. These presets are a good starting point to help you make adjustments so that you get the best possible photos.

For Desktop, Lightroom CC must be installed.

Desktop Presets can be.XMP files.

You can find Mobile Presets in.DNG files.
