CData Drivers for Paylocity offers a comprehensive suite of drivers designed for seamless integration with Paylocity data sources, enabling connectivity from various reporting tools, databases, and custom applications. These drivers ensure fast and reliable access to real-time Paylocity data, providing unparalleled query performance and extensive access to data and metadata. Whether BI, reporting, analytics, ETL tools, or custom solutions, **CData Drivers for Paylocity** seamlessly integrate with preferred analytics tools, offering robust, reliable, and secure data movement capabilities.

Support for popular database protocols like ODBC, JDBC, and ADO.NET, along with specialized interfaces for SQL Server and MySQL, simplifies connectivity and management of Paylocity data across various applications. Moreover, integration with data migration, ESB, iPaaS, BPM tools, and developer frameworks ensures flexibility and ease of use. Developers benefit from a data-centric model that streamlines integration, empowering them to build high-quality applications faster and more efficiently.

Furthermore, provides advanced data virtualization capabilities, offering a virtual database abstraction layer atop Paylocity data. This feature supports query federation and predicate pushdown, enhancing query performance and scalability. Overall, CData's Paylocity drivers facilitate seamless integration, enabling organizations to leverage Paylocity data effectively across various applications and workflows.

This package includes the following components:

- Excel Add-In for Paylocity
- Paylocity ADO.NET Provider

- Paylocity BizTalk Adapter
- Paylocity Data Cmdlets
- Paylocity FireDAC Components
- Paylocity JDBC Driver
- Paylocity MuleSoft Connector
- Paylocity ODBC Driver
- Paylocity Power BI Connector
- Paylocity SSIS Components
- Paylocity Tableau Connector

Key Features of **CData Drivers for Paylocity** :

1. Fast and reliable access to real-time Paylocity data
2. Unparalleled query performance
3. Extensive access to both data and metadata
4. Seamless integration with BI, reporting, analytics, ETL tools, and custom solutions
5. Robust, reliable, and secure data movement capabilities
6. Support for popular database protocols like ODBC, JDBC, and ADO.NET
7. Specialized interfaces for SQL Server and MySQL
8. Simplified connectivity and management of Paylocity data
9. Integration with data migration, ESB, iPaaS, BPM tools, and developer frameworks
10. Streamlined integration with a data-centric model for developers
11. Advanced data virtualization capabilities
12. Virtual database abstraction layer supporting query federation and predicate pushdown
