Tom Bolles CinePrint35 - Film Emulation Powergrades

2025-02-10 16:48:02 label 我要反馈 下载页面

Tom Bolles CinePrint35 – Film Emulation Powergrades:

"CinePrint35 Film Emulation" is a collection of PowerGrades for Davinci Resolve, created by cinematographer Tom Bolles, enabling filmmakers to replicate 16mm and 35mm film looks.

Developed using photometric profiles from extensive tests and processed at Fotokem, these emulations offer industrystandard quality.

The package includes presets for various film stocks and popular camera log profiles, with fully customizable node trees.

It supports both MacOS and Windows and offers a LUT version for other editing software.

Featured film stocks include Kodak Vision3 500T, Kodak Vision3 250D, and Fuji Eterna Vivid 160T, preserving the unique characteristics of celluloid film.
