下载页面

Hairy Text is an animated collection of letters, numbers, and symbols that have real hair. It can be used to create the words you want, or combine them to make sentences. You can also use it to create your own typography videos. You can use it to create your own animations or your own scenes. The project includes a help file that allows you to change the colors of the characters. Each character is in Ultra HD (3840x2160), resolution with an alpha channel. This allows you to use them in projects that require 4k or 8k displays.
