proDAD Disguise v2.0.214.2 (Win):

proDAD Disguise is a user-friendly tool designed to quickly and efficiently protect privacy in videos by pixelating faces and objects.

It simplifies the process of anonymizing individuals or removing sensitive details, which is often tedious in traditional video editing software. The tool allows for customizable mosaic sizes and additional blur effects.

Disguise also helps in removing unwanted advertisements or trademarks and can be used to highlight specific areas in a video, making it an essential tool for both personal and professional video creators looking to protect privacy and avoid potential legal issues.

- **Suitable for faces and objects**: The tool is versatile and able to track both faces and other objects.
- **Different mask shapes & polygons**: Users can create different mask shapes or polygons for precise tracking and editing.
- **Multiple masks in one scene**: It allows for the use of multiple masks simultaneously in a single scene, enabling complex edits.

What's New in V2:

- **Completely new user interface**: The user interface has been redesigned for a more intuitive and efficient experience.
- **Optimized tracking**: The tracking feature has been enhanced for greater accuracy and speed.
- **Extended export options**: New export formats and settings, providing more flexibility when saving and sharing projects.
- **Undo/Redo, Work history**: New features for better control, allowing users to undo or redo actions and track changes through work history.
- **Improved keyframe handling**: Keyframe functionality has been upgraded for more precise control over animations and edits.
- **Multi-monitor editing**: Support for multi-monitor setups, improving workflow efficiency for those with more than one display.
