Aescripts – Smart Key Reverse v2.1 (Win, Mac): Reverse complicated animations in just one click using Smart Key Reverse

Utilizing Smart Key Reverse, you can quickly reverse keyframes on multiple layers while keeping the time patterns of their relatives.

There is no need to repeat actions to make fade-out animation. Use Smart Key Reverse. If you want to perform your work faster, This handy tool reverses any animation using After Effects.

- Design that is simple and easy to understand
- Flexible settings
- Different kinds of reverse
- Reverse all of the specified properties
- Keyframe counter
- The complex animation can be switched in one click
- Full support for Kbar2 extension
- Keyboard shortcuts

New Changes:

- Added shortcut keys
- Fixed tab settings
- Minor changes
- Compact redesigned UI
- Work area reverse support
- Kbar support
- Badge level system
- High precise interpolation
- Minor bugs fixed

Keyframes that reverse

You can flip every keyframe of your complicated animation with just one click.

You can reverse the timeline using an appropriate time and flip keys out of the layers to produce fade-in and out motion. To control every animation step by creating keyframes that reverse in frames in the workspace.

Complete keyframe control for interpolation

Reverse your animation using precise keyframe interpolation, identical to the forward fade-in animation. Do not worry about the roving of keyframes. This allows you to make all kinds of animations easily

Smart Key Reverse supports all types of keyframes and their interpolation and moving keyframes. Include a button on your beautiful KBar toolbar to gain quick access to the Smart Key Reverse functions

In Time

reverse your keyframes according to the present time on the timeTimeector. This is the most effective way to gain more flexibility as well as to gain more control over the reverse.
