Blender Market - Tear Painter v1.0:

The chopped tears tool for Blender 4.1+ is a sophisticated tool that enables you to draw brush strokes and tear realistic fabric. This tool can simulate different types of fabric damage – this includes length, density, structure, or even a complete adjustment.

- Parameters for Cloth Tearing
- Length, weft, warp, angle, thickness, and density.
- Control over roll, gravity, noise, and spread for clump.
- Preset for Quick Application
- Default, burlap, jeans, fluffy, ragged, and ready-to-use presets.
- Multi-Layered Detail
- Fuzz, tear, weave, preserved threads, and border fuzz layers.
- Customization Tools
- Easy look customization for many fabric types.
- Portability Options
- Proxy Transfer for high-poly meshes.
- Adjustable geometry density.
- Compatible with UV mapping.
- Threads taper and caps ends to refine edges.
