To search for similar products to 105 Animated Icons,

Icon set of 105 animated icons. Resolution of an icon: 500×500. No plugins required. Looped & Animated In Easy to change colors.

Music used in the preview is not included.

- After Effects Version CS6, CC
- Files Included After Effects Project Files

Project structure

There are folders **!!Icon_Sets** (sets of icons grouped by category), **!ICONS** (compositions with separate icons), and **Assets** in Project Window.

You need to open one of the compositions with icon sets, adjust icon colors there, select the needed icon, copy it, and paste it into your composition, where you do your work. You can also drag the needed icon composition directly from the folder **!ICONS**. But remember: you can adjust the appearance of this icon in the **Icon_Set** composition containing this icon only.

Open one of the **Icon_Set** compositions. Select **layer Color_Control_IconSet** at the top of layers on the timeline. You can see a set of controls in the Effect Controls Window.

1. **Underlay** – check this checkbox to use underlay under icons.
2. **Underlay color** – change the color of the underlay.
3. **Custom_Colors**- change colors of icons.

Select the layer with the needed icon and press Ctrl+C. Then navigate to composition, where you do your work, and paste the icon (Ctrl+V) there.

Every icon has repeated animation for 30 sec approximately. You can easily cut the middle part of the layer and duplicate it to prolong the duration of this icon. If you want to use animate-out of the icon you should split the icon layer at the marker position and move this cut layer to the position at the timeline where it should be.

That's all!
