- And more

What is Blastwave FX Traffic?

Blastwave FX is a well-known company in the field of sound effects and audio production. They provide a wide range of sound libraries and effects for use in various media projects, including film, television, video games, and more. "Traffic" is likely one of the categories or themes within their sound effects libraries, focusing on the sounds associated with various aspects of traffic and transportation.

These sound effects can include recordings of cars, trucks, buses, motorcycles, bicycles, pedestrians, and various other elements related to urban and suburban traffic environments. Sound designers and media producers often use these types of sound effects to enhance the realism and immersive quality of their projects.
