What is MOTION WARP PRESETS?

Motion warp presets are a type of preset used in video editing and visual effects software to apply specific motion or distortion effects to video clips. These presets are often used to create dynamic and visually striking effects in videos.

It's important to note that the availability and functionality of motion warp presets may vary depending on the software you are using and the specific presets you want to use. Additionally, the term "motion warp presets" might encompass a wide range of effects and styles, so the exact effects achieved can vary widely from one preset to another.
