

Blender Market - Creative Flow v1.7.7

2025-02-10 16:49:02 label 我要反馈 下载页面

Blender Market - Creative Flow v1.7.7: Its Creative Flow add-on is a part of the Creative Bundle product along with Random Flow, which sells for the price of a bundle.

This add-on contains many necessary actions required to facilitate workflows, regardless of whether it's complex or organic modeling. Operators include Draw Faces, Extract Faces, Auto Mirror, Boolean features, Data Transfer capabilities, Additional tools, and many more. Gives you the ability to operate with a wide range of options. It's also a great extension of Random Flow.

HOW TO INSTALL:

Press F4 on the viewport to open the Preferences menu and select Add-ons. Click Install on the downloaded zip file directly from the store. It's the zip file itself is not the contents contained within. Then, you can install the add-on. You can type the add-on's name within the search field.

- Draw Faces - This allows you to draw faces that could be used as a basement or to create Boolean.
- Extract Faces – Take advantage of the topology of the meshes targeted to generate faces that can be used as a base mesh or to create a boolean.
- Auto Mirror - Fast mirror operator that works on many objects.
- Boolean Features Boolean operators allow you to work and manage booleans better.
- Data Transfer Features Data transfer is copying normals from a mesh to remove shadows or artifacts.
- Auto Quad Features Operators like Grid Project, and Quad Slice simplify converting the angular ngon models into quads.
- Intersect Features allows you to use the editing mode's boolean function in Blender significantly faster and more efficiently.
- Vertex Color Features Vertex Color Features - A collection of operators that simplify choosing, allocating, or choosing colors for the vertex.
- Extras The Extras section is a set of tools that could be helpful in certain situations.
