Delphi   Components   VCL

The is designed to enhance your application's connectivity capabilities using the Core Bluetooth API. It's compatible with Delphi versions 10.4 to 12, making it a versatile choice for developers working within this environment. This library supports Bluetooth Low Energy (BLE) clients, enhancing its utility for modern BLE-enabled devices, and includes the source code once you register. You can freely distribute your applications without worrying about additional fees.

Key Features of **Winsoft Bluetooth Library for macOS** :

1. Core Bluetooth API Integration: Leverages this powerful API to ensure robust and reliable Bluetooth connectivity.
2. Support for BLE Clients: This feature enables applications to communicate effectively with Bluetooth low-energy devices, which is crucial for modern IoT solutions.
3. Compatibility with Delphi 10.4 to 12: Works seamlessly across multiple versions of Delphi, ensuring broad compatibility.
4. Source Code Access: Gain insight and control over the Bluetooth functionality by accessing the source code with registration.
5. Royalty-Free Distribution: This option allows you to distribute your applications without the need to pay royalties, helping to reduce costs and simplify licensing.
