#### Aescripts Bullet Time v1.2.1 (Win):

Bullet Time is an AI-based frame interpolation tool designed for creating smooth slow-motion effects and increasing footage framerate.

It allows users to interpolate between two input frames, enabling seamless slow-motion from any footage by applying it to time-stretched layers.

Utilizing advanced AI models, Bullet Time offers high-fidelity results with customizable settings.

Optimized for high-resolution processing, it supports footage up to 4K on mid-class GPUs and M1/M2/M3 Macs, delivering excellent performance.
