Eric Bennett – Tools of the Trade – Vol. 4 – Post-Processing Techniques: In the fourth and final tutorial video of this series, we delve into 5 additional post-processing techniques essential for overcoming the limitations of our cameras and lenses, enhancing depth, mood, and composition cleanliness. This tutorial demonstrates how these techniques were applied in the post-processing of 20 different images:

- Focal Length Blending
- Cloning
- Dodging & Burning
- Enhancing Atmosphere
- Removing Lens Flares

Numerous examples are showcased for each technique, providing a comprehensive understanding of their applications across various scenes and lighting conditions. Whether you're a beginner seeking to learn essential Photoshop techniques or an advanced photographer aiming to refine your images, this video is invaluable.

No external plug-ins, apps, or programs are required to achieve the results demonstrated in this video. You'll only need Camera RAW/Lightroom and Adobe Photoshop.
